Date: November, 2005

SMILE! PCX1000 OFFERS A WHOLE NEW WAY TO MANAGE YOUR BUSINESS...

Now available in the latest release of PCX1000 version 7.1, you will find a whole new way to configure your back office needs.

With a modular pricing structure, you can opt for the store management solution that fits your budget. PCX1000 is now available in three versions **LIGHT**, **ADVANCED** and **PROFESSIONAL**, allowing you to gradually upgrade or include modules when needed.

In version 7.1 you will also find the latest new models from CASIO (**TE-2200/2400**), which expand your range of possibilities from a small liquor or grocery store to the highest demanding hospitality systems with the QT-6000 series. No matter what the task, you will have the tool that solves the needs.

Our powerful and flexible Back

Office and Inventory Control Software, with more than 10 years experience now became even more flexible!

Download and test a DEMO today at:

www.equitron.com/PCX1000

And remember our policy: "If you want a feature that's not yet available in our package, let us know, and we'll add it" for you!

New Features

- New modular lower pricing
- Light, Advanced and Professional configurations
- TE-2200/2400
- QT-6000
- New Database Server
- ECR Set-Up Guide included in Warehouse Window
- Purchase Order Utility for Hand-held Devices

NEW MODULAR LICENSE & PRICING

Giving way to a whole new concept, we now improve your productivity with a simple yet powerful feature rich software. Increase your efficiency of store management by upgrading on a step-by-step basis.

Delivering the most powerful back office, inventory and reporting utility you can get on the market today, it is now available at even lower prices than before.

Why? Because we have arranged a setup that can be adapted to the type of ECR solution you need.

PCX1000-LIGHT

Includes only the low and mid range ECR's : select from CE/TK6000, TE-2200/2400, TE-3000/4500.

You will be able to setup only one warehouse or store, and the inventory module will be an optional feature.

PCX1000-ADVANCED

Includes the low, mid and high range ECR's all the way up to TE-7000/8500.

You will be able to setup only one warehouse or store, and the inventory mod-

ule will also be an optional feature.

PCX1000-PROFESSIONAL

Giving the total power of multiple ECR and Multiple Warehouse management, you can select from the complete array of ECR's currently available from CASIO. All the way up to the new "touch sensation" QT-6000.

The inventory module is an optional feature that can be added at a later time if needed, just as in the Light and Advanced versions.

Included in the Professional series is also the option to use the Scheduler or Unattended Polling utility.

CUSTOMER / ACCOUNTS RECEIVABLE TRACKING

Previously available as an external module, the new Customer Control and Accounts Receivable is now integrated in PCX1000 v.7.1.

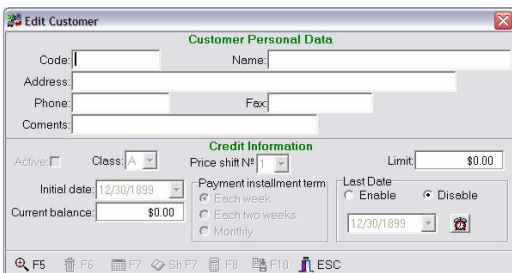

Designed originally to work only with MPS and Super Board fitted ECR's, you can now take advantage and use this

optional module through the included Billing features in PCX1000.

When used together with MPS or SPB, you can easily synchronize data with your PC via PCX1000's intelligent system synchronization. Movements recorded at ECR and PC will not interfere with

each other, helping keep your customer's balance up to date in seconds without errors or confusion. All editable fields are also synchronized with your ECR.

ries to your customer (A, B, C, etc) helping you group customer in various reports. Setup a price shift per customer and printout a list to easily to keep track of all information. Use with one ECR or multiple machines connected In-Line.

each other, helping keep your customer's balance up to date in seconds without errors or confusion. All editable fields are also synchronized with your ECR.

You can print out customer activity reports, account history movements, customer balances, or credit information. Assign specific catego-

Reports can be easily seen on screen or printed at a moments notice. Movement reports are also available, allowing you to categorize by code, date or daily journal.

Export the data for your accounting or book keeping department by means of Tab delimited or CSV type reports.

OTHER NEW FEATURES

QT-6000: CASIO calls it the "touch sensation". And we have matched the perfect back office an inventory software tool for the job! For a demanding hospital-ity market it's the tool that can solve your customer needs.

Merchandise Requisition: Should you

need any product currently available in your stock, it is possible to track and control consumed in-house inventory through this module.

PLU Assembly: Create in-house stock of assembled PLUs, from raw materials to final goods.

Replace Code: Whenever a code needs to be changed, it is possible to transfer all information (including historical data) to

the new code you want to assign.

Inflation Adjustment: Easy way to adjust all inventory costs up or down when needed.

Accounts Receivable / Accounting Interface: With the new Customer / Accounts Receivable module, you can also export receivables accounting data to Quick-Books or any other accounting software, accepting CSV data imports.

ECR SETUP WINDOW

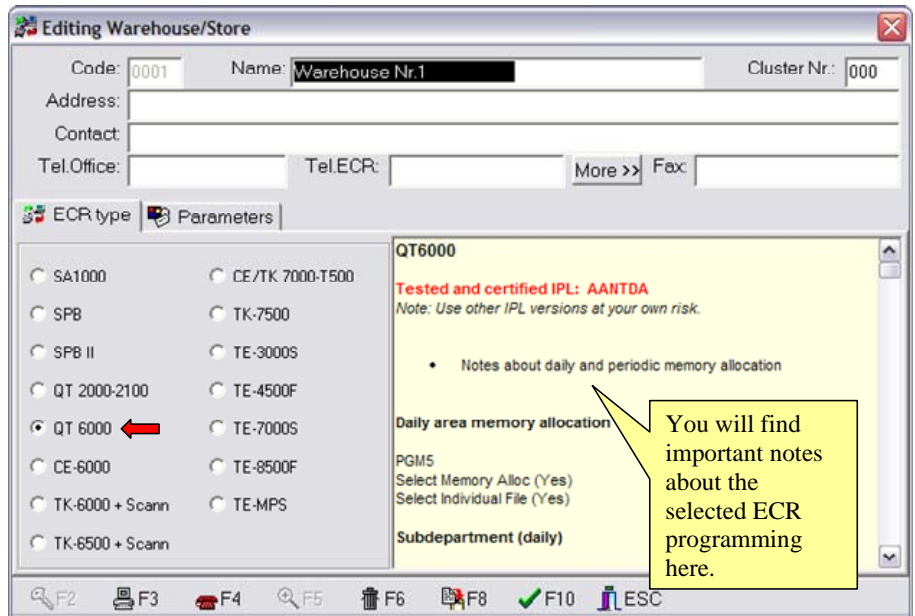

Notes & ECR-Setup Window:

When creating or editing a Warehouse or Store you will find a new window, showing important data on how to setup the selected ECR.

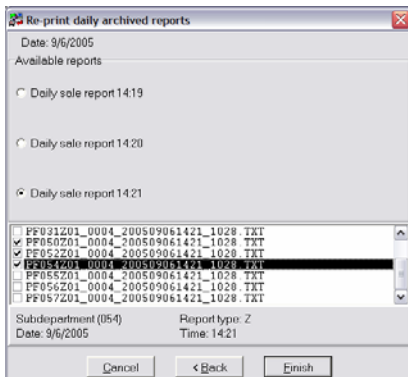

Each ECR model has particular notes and setup procedures.

We also provide important information regarding the IPL that has been tested and certified for use with PCX1000.

There is no need to seek about this information anymore. You will always find the necessary information for each release you install.

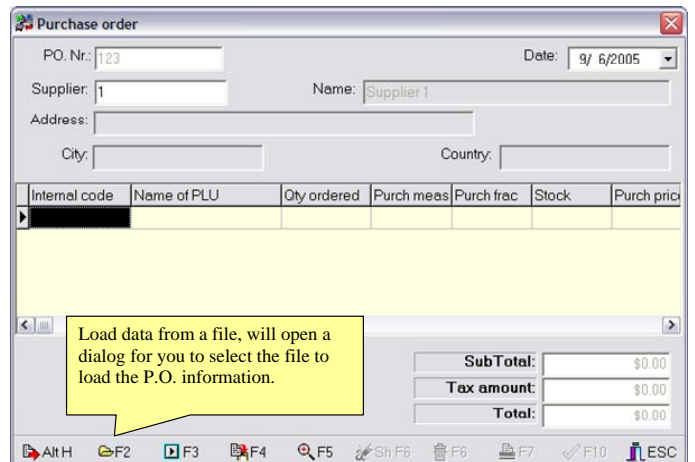

Easy to Pick Archived Reports:

This new easy-to-pick option will allow you to select the individual report (s) that you wish to reprint.

New Purchase Order Utility for Handheld Scanner Devices:

New, purchase order generation from an external file. This allows the use of a handheld scanner (or scan-pal) to produce a purchase order and load it to the inventory afterwards.

Load from (F2), will open a window where you can select the file from which to produce the new purchase order document.

New Firebird Database Server:

Reliable and robust engine.

Fast: in extensive reports, our benchmark testing showed major improvement, turning the wait time from hours into minutes. More than 2000% speed gain against the old Apollo Database Server.

Powerful: the database size is no longer a concern, it could be a couple of thousand records or millions of them, FireBird is designed to handle the load quickly and efficiently.

COMPATIBLE ECR MODELS / SPECIAL FEATURES
